INSTRUCTION SHEET

Indications on the instrument

Pay attention to the finish of the chosen instrument

We cannot guarantee the results on instruments with a glossy finish because the thicker nitro varnish will tend to trigger small flashes that may create small bubbles or lines that are not always clear.

Always consider the shape of your ukulele.

The graphic must respect a safety margin around the printing surface following the contours of the tool to avoid being cut.

Remember the orientation of the graphics.

If you play left-handed, graphics printed "right-handed" may appear upside down. So remember to specify the direction of orientation.

We guarantee excellent results on wood only.

The laser works very well on all natural wood species, but we do not guarantee the same results on plastic or other materials.

Formato file

Graphics must be in black and white.

The laser is not able to reproduce colours, so it will be useful to already receive a black and white graphic with possible shades of grey.

The size of the lettering must not be less than 9 pt.

Smaller sizes would be too small for printing.

Use the correct resolution.

In order to guarantee a detailed print you will need a high resolution graphic of the chosen size and with at least 250 DPI .

> **(i)** *DPI is the unit of measurement for the amount of ink dots a printer can deposit per inch. It is a value that many graphics software can vary to suit your needs. With low dpi values the print may not be accurate and some pixels may be visible. a high resolution graphic of the chosen size and with at least 250 DPI.*

The graphics file must be sent in TIF, JPG, PNG or PDF format.

Do you have any questions about the realisation of the print files?

INSTRUCTION SHEET

Name Surname _____

STEP 1. Front / Back

Indicate if you want front to back printing on your ukulele
In case you want to print both front and back, we ask you to
we ask you to proceed with a second order

Front   Back

STEP 2 . Graphic file realisation

You don't know how to create the graphic file, we'll take care
of that for you.
You can send us your idea and we will take care of the
graphics. You will be offered 3 different proofs to choose
from

YES + € 5,00   NO

STEP 3 . Design size

Indicates maximum print size

*You can select one or more sizes and indicate how many of
these boxes you want to use.*

5 cm x 3 cm € 10,00 each.	*n.*
5 cm x 5 cm € 15,00 each	*n.*
10 cm x 5 cm € 20,00 each	*n.*
15 cm x 10 cm € 25,00 each	*n.*
intera superficie € 100,00 each	*n.*

STEP 4 . Direction of the drawing

Right–handed   Left–handed

STEP 5 . Position of graphics

Colour the area in which you would like the graphic to be placed.

You don't need to be precise at this stage, it only serves to prepare the graphic file that we will submit to you before printing.

Printing within the red area + € 5,00*

**The central part of the soundboard marked in red is occupied by the strings which must be cut in order to print within this
area. If you want the artwork to occupy this area, you will have to pay an extra 5€ to change the strings.*
